## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 2, 5, 9, 11, and 22 are rejected under 35 U.S.C. 102(b) as being anticipated by Willis et al (US5158064).

Willis et al discloses an overheated steam oven having a cabinet (10) to define a cooking cavity (42), and an overheated steam generator (14, 24) comprising a steam generating vessel (14), an outlet (44) to communicate with the cooking cavity (42), first and second heaters (38, 50) to produce steam wherein the first heater is immersed in water and the second heater is in the upper portion above the water (Figure 2, column 2, line 37-column 3, line 8), the steam generating vessel provides insulation (14, Figures 1-2), an inner vessel (14) part which contains the first and second heater, a steam inlet part (44) provided on the rear wall and comprises a bent part (Figure 2), and the cooking cavity comprising a plurality of sheets spaced apart from each other to insulate the cooking cavity (Figures 1-2).

### *Claim Rejections - 35 USC § 103*

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person

Art Unit: 3742

having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 8, 12-13, 18-19, and 21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Willis et al in view of Maniscalco (US3639725).

Willis et al discloses all of the recited subject matter except a water level sensor. Maniscalco discloses a water level sensor (16). It would have been obvious to one of ordinary skill in the art at the time the invention was made to have included the water level sensor of Maniscalco in the overheated steam oven of Willis et al because, a water level sensor prevents the steam generator from overheating.

#### *Allowable Subject Matter*

5. Claims 3-4, 6-7, 10, 14-17, and 20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

#### *Conclusion*
